3. (20%) Stereo Disparity Map

(出題：Mark)

- Given: a pair of images, imL.png and imR.png (have been rectified)
- Q: Find the disparity map/image based on Left and Right stereo images.

imL.png

Left Image (Reference Image)

imR.png

Right Image

3.1 (20%) Disparity Map

- Guides:
  (1) Window Size: Must be odd and within the range [5, 255]
  (2) Search range and direction:
  - Disparity range:
    - Must be positive and divisible by 16.
    - Map disparity range to gray value range 0~255 for the purpose of visualization.
  - If the left image is the reference image (the one used to cal. depth info for each pixel of that img), then the search direction at right image will go from the right to left direction.
